Minimizes Infection Risk with Probiotics that Create a HEALTHIER, SAFER and CLEANER ENVIRONMENT!

Chrisal Probiotic All Purpose Cleaner (PIP)

Evaluated by independent clinical trials and used extensively by hospitals, Chrisal is a revolutionary hypoallergenic general cleaner. Proven to significantly reduce risks associated with pathogens, including those that cause **C. Diff** and staph infections, such as **MRSA**, Chrisal forms a long-lasting layer of beneficial probiotics on surfaces. Creating a safe and stable environment, Chrisal treats problems linked to dust mites, molds, and mildews. Unlike products that only clean on contact, Chrisal uses Class 1 Bacteria which keeps cleaning and protecting surfaces for up to 3-5 days. Cleaning down to the microscopic level, Chrisal breaks apart the biofilm that shields dirt, harmful bacteria, viruses and other contaminants. Totally safe to handle, Chrisal products eliminate odors at their source, are 100% Biodegradable, and are not harmful to children or pets.

IDEAL FOR

- HealthCare Facilities
- Commercial Cleaning
- Assisted Living
